<b>Database</b>	<p>A SQL Database</p> <ul style="list-style-type: none"><li>• <a href="#">MySQL</a></li><li>• <a href="#">PostgreSQL</a></li><li>• <a href="#">Firebird</a></li></ul>
<b>Web Server</b>	<p>A PHP compatible Web Server</p> <ul style="list-style-type: none"><li>• <a href="#">Apache</a> (Recommended)</li><li>• ISS (not tested)</li></ul>
<b>Scripting language</b>	<p>A PHP compatible Web Server</p> <p>Recommended :</p> <ul style="list-style-type: none"><li>• Slabatron XSLT (XML/XSLT processor, if not installed web browser to process XML)</li><li>• - XSLT capable browsers are Firefox &gt; 1.0.1 and IE &gt; 5</li><li>• <a href="#">Curl</a> (only required for distributed API server connection)</li><li>• Global variables off (security)</li><li>• Magic quotes off (unnecessary)</li><li>• <a href="#">Zend optimizer (free)</a></li></ul>
<b>SMS</b>	<p>Added functionality</p> <ul style="list-style-type: none"><li>• <a href="#">TenderSystem</a> uses Clickatell's SMS gateway to send out RFQ (Request for Quotation) and notifications.</li><li>• <a href="#">Click here to open a Clickatell account.</a></li></ul>

All Users (Subscribers, Agents and Administrators) must have internet access and be able to receive HTML emails.

There are many kits available at [hotscripts.com](http://hotscripts.com) to install Apache, PHP and PostgreSQL or MySQL or read the tutorial at [LinuxPlanet](http://LinuxPlanet) how to install [XAMPP](http://XAMPP).

---

## Installation

- Download the source code from <http://sourceforge.net/projects/tendersystem/>
- Extract the source file under your Web Servers localhost
- If you are installing under an Operating System with File Permissions ensure that the following files have read / write permissions:
  - modules/settings/config.inc.php
  - modules/public/config.inc.php
  - modules/loader/config.inc.php
  - modules/languageeditor/config.inc.php
  - application/include/modules/settings/config.inc.php
  - application/include/modules/tender/config.inc.php
  - application/include/modules/public/config.inc.php
  - application/include/modules/report/config.inc.php
  - application/include/modules/user/config.inc.php
  - application/include/modules/password/config.inc.php
  - application/include/modules/category/config.inc.php
  - upload
  - rollback
- (Optional) If you want to use the Language Editor and Module Loader ensure that the following folders and all it's contents have read / write permissions:
  - modules
  - application/include/modules
- On the Database Server create a database called **tendersystem** and create a username and password (required) with global privileges for the database.
- In your web browser go to where you extracted the source files and select index.php e.g. [www.yoursite.com/index.php](http://www.yoursite.com/index.php)
- *Note Once installed, index.php takes you to the main page.*
- **(Optional) Load Another Language**
  - Click on Load Language in Left Frame
  - Select the language Pack to upload and click upload
