

You and your students will LOVE QuickCount!

a web based in class Student Response System

Just type the following URL in your browser: ***qkcount.com/qcountlx***

If you are the student, click STUDENT, otherwise INSTRUCTOR...

Welcome to Quickcount! (c)

Quickcount (c) allows audiences to provide anonymous feedback to public speakers, by using their computers to answer multiple choice questions. This improves audience involvement! Start by selecting Student or Instructor. Use By Invitation Only!

Student

Instructor

STUDENT sends you to the student VOTER SCREEN.
Enter the Instructor ID and you are ready to VOTE!

Instr ID:

Quickcount Vote!

InstrID will be given by instructor, and MUST be entered!

[Home](#) Click Your Choice - Only ONE TRY per question!

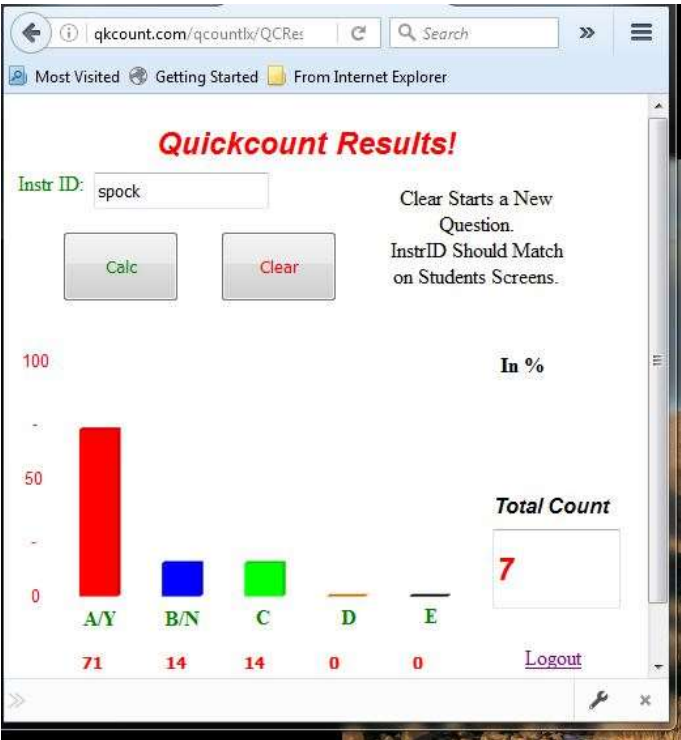

Graphic Results

Register

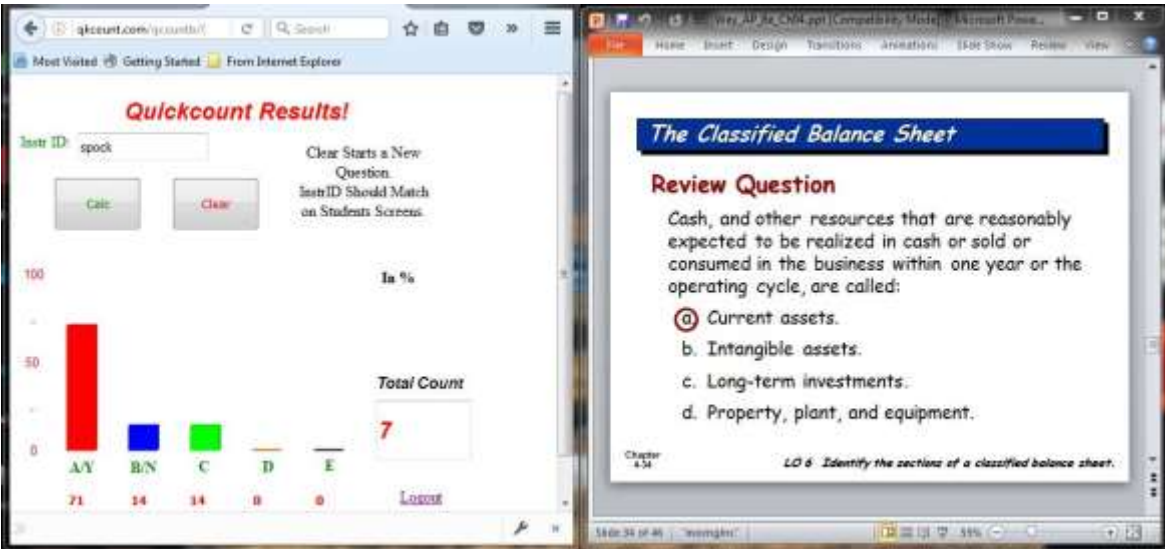

[Back](#)

Then Press the GRAPHICS RESULTS button.

The RESULTS SCREEN will come up. CLEAR and you are ready to receive your Students Votes for the First and subsequent Questions. Press Calc to refresh.

You can format your browser window and slides so your class can relate the RESULTS and Question you are on! Note that there is no preparation of special slides or questions in QuickCount itself. So the system adds no work, and requires no changes to your lecture. You just use it to get better feedback during your lecture.

Professor: You can start using QuickCount by getting your SCHOOL CODE from ballweiss55@gmail.com

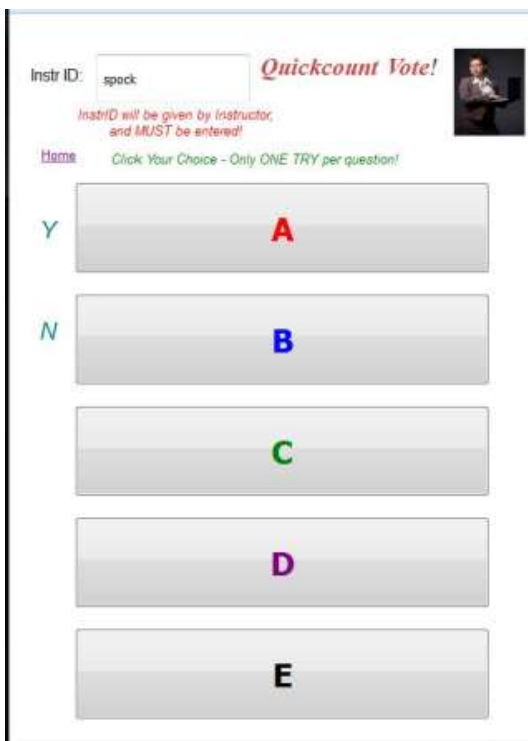

- Go to the INSTRUCTOR LOGIN screen in the same way you Login. Then just enter the SCHOOL CODE and press REGISTER.
- On the REGISTRATION SCREEN, enter your desired LOGIN ID and PASSWORD.
- Then press REGISTER. You will be returned to the LOGIN screen.
- You then use the SCHOOL CODE, LOGIN and PASSWORD to Login on the INSTRUCTOR LOGIN screen.

When using the system, make sure your students put your Instructor ID on their VOTER SCREENS to tie into the RESULTS Screen!

Don't have computers in your classroom? No Problem!

QuickCount runs on popular Mobile Devices that have Browsers.

To Vote on an Android Phone, open your browser
and type in qkcount.com/qcountlx . Press the
Student Button. The android browser
Voter Screen functions as described above.

The screenshot shows the QuickCount Voter interface. At the top, there is a text input field for 'Instr ID:' containing the value 'spock'. To the right of this field is a red banner that says 'Quickcount Vote!' and a small profile picture of a man. Below the Instr ID field, a red note states: 'InstrID will be given by instructor, and MUST be entered!'. Underneath this is a 'Home' link and a green instruction: 'Click Your Choice - Only ONE TRY per question!'. The main part of the screen consists of five large, light-gray rectangular buttons arranged vertically. Each button has a letter in the center: 'A' (red), 'B' (blue), 'C' (green), 'D' (purple), and 'E' (black). To the left of the first two buttons, the letters 'Y' and 'N' are visible in green, likely representing 'Yes' and 'No' options.

For iPhone, the Voter is brought up on Safari through the qkcount.com/qcountlx login and pressing Student. Then just use the Voter page as you would on a PC .

The Instructor can use their own smartphone to read the class response. On Android open the browser and enter qkcount.com/qcountlx . The android browser Response screen functions as described above.

To use your iPhone to see your class response, simply use your device in the same way as your would a PC.

Please let me know how things go!!
